Healthy Alberta Communities: A Community Capacity Building Project for Chronic Disease Prevention

PRESENTED BY

Heather Deegan, MSc, RD (Project Coordinator)

Candace Nykiforuk, PhD (Assistant Professor)

Healthy Alberta Communities is a project of the Centre for Health Promotion Studies, School of Public Health at the University of Alberta, which utilizes a community-driven health promotion model to address the root causes of obesity and chronic disease. This seminar will: (1) highlight project work in communities to develop models of effective community participation in prevention activities; (2) illustrate how collaborative, inter-sectoral partnerships contribute to the development of interventions to remove physical and social barriers to healthy living; and (3) present a comprehensive model of evaluation to identify the degree and nature of change in the demonstration communities.

Thursday, January 25, 2007, 12:00 - 1:00 PM

Dvorkin Videoconference Centre

2G2.07, Walter C. Mackenzie Health Sciences Centre, U of A Hospital
