

ITCB SIMULATION OSCE REVIEWER (Emergency Medicine & Medical Education Hybrid Opportunity!)

Volunteer role description: Thanks for your interest in contributing to the ITCB curriculum and undergraduate medical education. The goal of this role is to offer an opportunity to review the Simulation OSCE Checklists that will help 2nd year medical students develop a thorough approach and good habits when faced with an acute care and code blue situation. Each must-see checklist item should be tasks that facilitators are able to evaluate. As well, the Simulation OSCE Scenarios should be written in a format that is easy to understand and realistic. Each Simulation OSCE Checklist should intentionally have some overlap in checklist items, so that approaches are reinforced as students work through the four stations.

Volunteer task summary:

1. Review the ITCB Presentation on <http://ucalgary.ca/codeblue/facilitators> to determine what content the students learn during the lecture component of their ITCB session
2. Review the Simulation OSCE Checklists on <http://ucalgary.ca/codeblue/osce>.
3. Send your **OSCE feedback/edits** to avseto@gmail.com for review and subsequent update on the ITCB website.

To sign-up as a Simulation OSCE Reviewer, please email Anthony (avseto@gmail.com). Please submit the completed **OSCE feedback/edits** to avseto@gmail.com by June 5th of the ITCB year.
