

# History of Medicine Days

## Instructions for Oral Presenters

1. Oral presentations will be 10 to 12 minutes. 2-3 minutes are allowed for a few questions and answers.
2. A slide will be sent to Oral Presenters with their acceptance package. This slide must be inserted at the beginning of your slides, and an oral declaration made that you
3. Each student must present an original historical research attempt with new methodological perspectives on the topic and/or have a critical discussion following the presentation.
4. If three to four students would like to present together on a related topic, this could be done in a panel form. A suitable discussant will then be identified by the conference organizers to comment upon these particular presentations. We ask, however, that presentations and poster abstracts be sent in by one author only, not multiple authors.
5. The Libin Theatre has a PC computer built right into the podium so all the presenters will need to do is bring their presentation on a memory stick or CD. Our standard setup will also include a podium microphone, wireless presentation microphone and a laser pointer.
