

## Artificial Intelligence for Public Health in Seattle Supplementary Questionnaire

What specific aspect of this program (e.g., public health, artificial intelligence, urban studies, geography, critical technology studies) is most interesting for you?

What sort of experience do you have working in that field, either in coursework, employment, volunteering, or hobbies?

What experience do you have in the other aspects of the program? What sort of background skills do you bring to the program?

Is there anything about your personal or professional background that you would like us to know as we assemble teams?

**Optional response:**

Please feel free to share anything about your background that you feel will add to the diversity of experience and/or thought on this program.
