Worth ___ credits

| Assignment | Worth % | Grade | | | Course grade /100 [Worth %] x [grade] | Running course grade /100 Add up course grades so far |
|------------|------------|-------|---------------|-----------------|------------------------------------------|-------------------------------------------------------|
| | | % | Grade Pts. | Letter grade | | |
| Essay | 30 | 71 | 3.0 | В | 30 × .71 = 21.3 | 21.3 / 100 |
| Quiz | 10 | 63 | 2.3 | C+ | 10 x .63 = 6.3 | 21.3 + 6.3 = 27.6 / 100 |
| Final | 60 | | | | | |

To calculate final mark needed to achieve goal:

Running course grade + [worth % of final]x = goal grade

i.e. Say your goal grade was 70%...

27.6 + 60x = 70

60x = 70-27.6

60x = 42.4

X = 42.4/60

X = .707 = 70.7% So you would need 70.7% on the final to get 70% overall.
