The Universities of Alberta and Calgary, along with the Institute of Health Economics, have led the formation of the Alberta RWE Consortium. Consortium membership also includes Alberta Innovates, Alberta Health, Alberta Economic Development and Trade, and Alberta Health Services.

FACILITATING THE GENERATION OF ROBUST REAL WORLD EVIDENCE

ABOUT THE CONSORTIUM

www.AlbertaRWE.ca
Real World Evidence (RWE) studies investigate the impact of an intervention or technology on health outcomes and resource utilization in clinical conditions outside of the controlled clinical trial setting. They are playing a growing role in technology adoption, as well as health policy and clinical practice decision-making, recognizing some of the limitations of traditional controlled clinical trials.

FUNCTIONS OF THE CONSORTIUM

- Optimization of Alberta’s RWE studies
- Strengthening the Alberta RWE ecosystem
- Providing world class project support services, including study design, execution, and knowledge sharing
- Identifying and supporting projects that align with provincial health and policy priorities, ensuring relevance to decision-makers in Alberta
- Convening the best pan-provincial teams for commissioned, large-scale projects that may also have implementation components

THE ALBERTA REAL WORLD EVIDENCE (RWE) CONSORTIUM

FACILITATING THE GENERATION OF ROBUST REAL WORLD EVIDENCE

Alberta has one of the largest, most mature, detailed and comprehensive health system data depositories in Canada.

It also has distinct advantages that make the province attractive to health and life sciences-related activity, including:

- A single health authority and the largest fully integrated health system in Canada
- Strategic Clinical Networks to drive innovation and its implementation across the health system
- Advanced and comprehensive health information systems and database assets
- World leading clinical, methodological and analytic expertise in universities and research centres
